BIOLOGICALLY ACTIVE SUBSTANCES OF THE NATURAL ORIGIN IN THE REGULATION OF VITAL PROCESSES

International Scientific and Practical Conference

September, 17-18, 2020, Grodno, Republic of Belarus

First announcement

Dear Colleagues,

We hereby announce the International Scientific and Practical Conference Biologically Active Substances of Natural Origin in Regulation of Vital Processes dedicated to the 50th anniversary of the foundation of the Institute of Biochemistry of Biologically Active Compounds of the National Academy of Sciences of Belarus which will be held in the city of Grodno, Republic of Belarus, between the 17th and the 18th of September 2020. The conference organizer is the Institute of Biochemistry of Biologically Active Compounds of the National Academy of Sciences of Belarus (further referred to as the Institute).

The goal of the Conference is to review the results of the 50-year research activity of the Institute and to discuss the current state and prospects of research into biologically active substances of natural origin in regulation of vital activity processes both in health and disease, as well as to extend international cooperation in different fields of biochemistry, molecular biology and biotechnology and to develop new joint programs and research projects.

The structure of this event will include a plenary session, a poster session and such workshops as Vitamins and Coenzymes in Metabolic Regulation and Prevention of Noninfectious Diseases, Regulation of Metabolic Processes in Health and Disease, Biotechnologies of Production of Natural Biologically Active Compounds, Biochemical Aspects of Threpsology and etc. Taking into consideration the fact that the chief aim of the Institute's activities is to study medicobiological problems of effects of alcohol on the body and development of alcohol dependence, a round table
